

They're non-toxic to soil and water.

Underground tanks are long-lasting,  
easily maintained and environmentally friendly.

## UNDERGROUND PROPANE TANKS. EVERYONE SEES MORE GREEN.

Propane is clean burning and environmentally friendly, which makes it popular with green builders. And since propane tanks can be installed underground, it's a hit with homeowners, too. Dig deeper about propane's efficiency and reliability at [buildwithpropane.com](http://buildwithpropane.com)
