

Benefits of going green with propane:

- Propane offers clean burning energy
- Economically and environmentally friendly
- Propane gives off less than half the Greenhouse gas emissions that electricity does
- Propane has lower carbon content compared to gasoline, fuel oil, ethanol and diesel

■ Propane is non toxic and insoluble in water. Propane is released like a gas so there is no spilling of the product. This ensures that propane will not harm soil, water, and the environment in the unlikely event of a tank leak.

■ Propane is safe and virtually non-combustible. When propane is combined with air the ignition-point has to reach 940 degrees F.

SAFETY a small investment for a healthy future!

Who is Blue Flame?

Blue Flame Propane, which is owned by the Foster family has been in the home heating service for over 65 years. Blue Flame started in Lexington and now has customers throughout the state of Michigan. Our main objective is to become recognized as the most customer-oriented energy supplier in the state. We are continually striving to satisfy our customers' every need. Our reputation is directly maintained by our customers' satisfaction.

Blue Flame is owned and operated by people who you know and meet every day. Blue Flame is based in your home town. You can see them active in your community, supporting many activities. When you see the Blue Flame name, you know that Blue Flame Propane is your hometown supplier.

Visit us on the web to see our programs and services that Blue Flame can provide you! Conveniently Access and Manage your account online at the click of a button.

Budget Service

Blue Flame propane understands the high cost of heating your home. We offer our "Budget Program" to all customers. The program is designed to offset the extreme financial burden of the cold season's heating bills. Our budget program allows you to make equal monthly payments based on your anticipated gas usage from the date of installation to May 31st. Installation charges can also be included in your monthly payment. The budget program begins in July and ends in May (11 month program). Payments are due on the 10th of each month.

■ Take advantage of our ACH program and have your budget payment automatically withdrawn from your checking or savings account.

Will Call Service

Will call deliveries occur only at the request of the customer. We urge all "will call" customers to call their local plant when their gauge reads 20%. Receive a five cent discount if your call is placed within the 20% mark to better service you.

Courtesy Fill Service

Blue Flame Propane offers our "courtesy fill service" to customers who do not want to worry about running out of gas. We schedule your deliveries based on your consumption of gas in relation to the average outside temperature. We calculate your deliveries to arrive when your gauge reads approximately 20%.

■ Receive a discount on current market price through our "prompt payment program" when payment is remitted within 10 days after delivery.

Your reliable heating Professional is Blue Flame Propane

■ Selecting the right heating professional is an important decision. There are many qualities that a customer looks for in choosing a reputable supplier. Blue Flame Propane meets all of the criteria that you as a customer would expect. We offer competitive pricing, friendly well trained staff and safety is our priority!

■ Blue Flame Propane provides all of the GAS Check® procedures that need to be made at the time of installation to insure your system runs safely and efficiently.

■ We also provide comfort for your pocket book through a variety of payment plans: Pre-buy, Lock-in and Budget pay – all developed to help you maintain your family's budget.
